

ROSIS (Rotherham School Improvement Service)

Context: A group of 25 schools serving a variety of primary, secondary, special needs schools, sharing best practice in the northeast of England.

Need: Creation of video content and supporting materials on an e-learning platform to share across their schools for the purpose of staff development and school improvement.

Choices: Guide created 50 minutes of animated bespoke content for the group as well as introductory videos to assist with onboarding, as well subscribing to Guide's back-catalogue of courses and qualification opportunities.

Outcomes: All schools in the group were utterly satisfied with the subscription services and the scope and deployment. Guide's offering has formed the basis of the successful application to be a Super Teaching hub supporting 500 schools.

Feedback: *"The Guide platform is at the heart of our offer to our schools. Very pleased to continue our partnership with them."*
